Dear Sir/Ma'am,

Conart Engineers (<https://www.conartengineers.com/training>) has launched a CSR activity to provide Civil Engineering professionals with 2-weeks of online training related to the "Practical Aspects of Construction" (please refer to attached curriculum) before they are ready for internships.

The training provides knowledge that applies to fieldwork and an introduction to software to manage projects efficiently.

We try to bridge the gap between college education and project-site skill requirements.

We would like to introduce your students to our program so that they can benefit from our CSR activity. Please provide a convenient time to discuss further.

Thanking you,  
Team Lead  
Construction Revolution 1.0
