BASICS OF EVENT MANAGEMENT

UNIT – I Why Event Management, Requirement of Event Manager, Analyzing the events, Scope of the Event, Decision-makers, Technical Staff, Developing Record-Keeping Systems, Establishing Policies & Procedures

UNIT – II Preparing a Planning Schedule, Organizing Tasks, Assigning Responsibility, and Communicating, Using the Schedule Properly, The Budget, Overall Planning tips, Checklists, Expert Resources, Computer Software Required.

UNIT – III Who are the people on the Event, Locating People, Clarifying Roles, Developing content Guidelines, Participant Tips, Reference Checks, Requirement Forms, Introduction, Fees & Honorariums, Expense Reimbursement, Travel Arrangements, Worksheets.

UNIT – IV Types of Events, Roles & Responsibilities of Event Management in Different Events, Scope of the Work, Approach towards Events

UNIT – V Introduction to PR – Concept, Nature, Importance, Steps, Limitations, Objectives Media – Types of Media, Media relations, Media Management PR strategy and planning – identifying right PR strategy, Brain Storming sessions, Event organization, writing for PR

Mewar University
Department of Chemistry
Value Added Course
Syllabus: Chemistry ICT Tools

Unit – 1

Introduction to online chemical database search, Searching and downloading research papers using keywords in Scopus, Science direct, and google scholar, reaction search, product search, reactant search, structure search. Introduction to End Note and its applications.

ACD ChemSketch software:– Introduction, download and installation process, Drawing various chemical structures (acyclic, cyclic, polycyclic, heterocyclic), name generation from structures, conversion of name of molecule into its structures.

Unit – 2

Chem3D software:- Introduction, download and installation process, 3D structure of molecules, various 3D structure models, conversion of 2D structure into 3D structure, File extensions, Dihedral angles, Energy minimization, calculation of surface properties, solvent accessible surface. Atomic charge calculations, Calculation of dipole moments, Calculation of UV and IR spectra using MM2 calculations.

Unit-3

Chimera 1.12 software:- Introduction to Chimera software, Protein-ligand Docking, Protein data bank structure search, preparation of ligands and proteins for docking, Sites searching for ligand binding analysis, Docking of simple molecules over active site of protein molecules and analysis of docking results.

Chemistry ICT Tools Lab

1. Hands on training on software.

DEPARTMENT OF ENGLISH

Value Added Course: **Communicative English**

Course Objectives:

This course is designed to give learners the confidence to do basic interactions and transactions in oral and written English required in specific employment such as customer service, financial service, medical representative, retail and tourism. The prime focus is on developing speaking and listening skills, although there are also some reading and writing tasks.

Course Outcome:

- Increased ability of students to overcome anxiety and nervousness while appearing for interview and public speaking.
- Increased ability to make quality speeches and presentations.
- Impart the fundamentals of English as a language.
- Improved fluency in English speaking.

MODULE I:

Effective Communication: Concept of Effective Communication; Components of Effective Communication -Conviction, confidence & enthusiasm, Type of communication, verbal, Non-Verbal Communication -its importance and Nuances-Facial Expression, Posture, Gesture, eye contact, Appearance barrier in communication feedback.

MODULE II:

Listening: It's importance, Good and Bad listening, Listening Communication Process, Advantage of listening, How to become a good listener

MODULE III:

Language for Communication: Language and Communication, General Principles of Writing; Improving Writing Skills; Essentials of good style; Expressions and words to be avoided; Grammar and Usage

MODULE IV:

Reading Skills: Reading Skill; Purpose of Reading; Types of Reading; Techniques for Effective Reading.

MODULE V:

Employment Communication : Resume: Contents of Good Resume; Guidelines for Writing Resume Different Types of Resumes ;Reason for a Cover Letter to Apply for a Job ; Format of Cover Letter ;Different Types of Cover Letters; Job Interview :Importance and Factors Involving Job Interview; Characteristics of Job Interview, Job Interview Process; Job Interview Techniques- Manners and etiquettes to be maintained during an interview ;Sample Questions Commonly asked During Interview

**VALUE ADDED COURSE
DISASTER MANAGEMENT**

L	T	P	Cr
3	1	-	4

Internal Evaluation: 50 Marks
External Examination: 50 Marks
Duration of Examination: 03 Hours

Course Objective:

To develop the understanding among students about various disaster and hazards as well the characteristics and their assessment for risk assessment, risk reduction, coping with disaster, response, recovery and planning for disaster management.

Course Outcome:

Understanding the principles of disaster management, including risk assessment, hazard analysis, and emergency planning. Developing skills in disaster response and recovery, including effective communication, resource management, and coordination with emergency services. Developing critical thinking and problem-solving skills necessary for effective disaster management. Understanding the importance of community preparedness and engagement in disaster management.

UNIT-I	Understanding Disaster: Concept of Disaster - Different approaches - Concept of Risk - Levels of Disasters - Disaster Phenomena and Events (Global, national and regional). Hazards and Vulnerabilities: Natural and man-made hazards; response time, frequency and forewarning levels of different hazards - Characteristics and damage potential or natural hazards; Types of disasters- floods, cyclones, lightening, thunderstorms, hailstorms, avalanches, droughts, cold and heat waves, epidemics, pest attacks, forest fire, chemical, industrial, radiological and nuclear disasters, building collapse, rural and urban fire, road and rail accidents etc.
UNIT-II	Hazard assessment - Dimensions of vulnerability factors; vulnerability assessment - Vulnerability and disaster risk - Vulnerabilities to flood and earthquake hazards. Disaster Management Mechanism: Concepts of risk management and crisis managements - Disaster Management Cycle - Response and Recovery - Development, Prevention, Mitigation and Preparedness - Planning for Relief
UNIT-III	Capacity Building: Capacity Building: Concept - Structural and Non-structural Measures Capacity Assessment; Strengthening Capacity for Reducing Risk - Counter -Disaster Resources and their utility in Disaster Management - Legislative Support at the state and national levels. Coping with Disaster: Coping Strategies; alternative adjustment processes - Changing Concepts of disaster management - Industrial Safety Plan; Safety norms and survival kits -Mass media and disaster management
UNIT-IV	Planning for disaster management: Strategies for disaster management planning - Steps for formulating a disaster risk reduction plan - Disaster management Act and Policy in India - Organizational structure for disaster management in India - Preparation of state and district disaster management plan. Case studies: Natural and man-made disasters, preparedness and planning

FULL STACK WEB DEVELOPMENT

HTML:- Introduction to HTML, Browsers and HTML, Editor's Offline and Online, Tags, Attribute and Elements, Doctype Element, Comments, Headings, Paragraphs, and Formatting Text, Lists and Links, Images and Tables.

CSS:- Introduction CSS, Applying CSS to HTML, Selectors, Properties and Values, CSS Colors and Backgrounds, CSS Box Model, CSS Margins, Padding, and Borders, CSS Text and Font Properties, CSS General Topics.

JavaScript:- Introduction to JavaScript, Applying JavaScript (internal and external), Understanding JS Syntax, Introduction to Document and Window Object, Variables and Operators, Data Types and Num Type Conversion, Math and String Manipulation, Objects and Arrays, Date and Time, Conditional Statements, Switch Case, Looping in JS, Functions.

ReactJS:- Introduction, Templating using JSX, Components, State and Props, Lifecycle of Components, Rendering List and Portals, Error Handling, Routers, Redux and Redux Saga, Immutable.js, Service Side Rendering Unit Testing, Webpack.

Node JS:- Node js Overview, Node js - Basics and Setup, Node js Console, Node js Command Utilities

Node js Modules

Node js Concepts

Node js Events

Node js with Express js

Node js Database Access

MongoDB:- SQL and NoSql Concepts, Create and Manage MongoDB, Migration of Data into MongoDB, MongoDB with PHP, MongoDB with NodeJS, Services Offered by MongoDB

Python:-

Learn the basics of python and use it to develop applications. Also learn to work with mongodb in python. This additional language is a value-added skill as python is increasingly in demand for full stack projects. In this module, you will learn:

Python Installation & Configuration, Developing a Python Application, Connect MongoDB with Python

Fundamentals of Marketing Management

Course Objective: The objective of this paper is to familiarize the participants with concepts, Techniques and skills of marketing and their applications in business

UNIT1: Intro to marketing

Nature, Scope & importance of Marketing, basic concepts, function of marketing, marketing Vs Selling, role & functions of Marketing Manager, Marketing Environment

UNIT2: Market Segmentation, Targeting & Positioning:

Meaning, Definition, Different ways to Segment Market, Bases for Market Segmentation, Targeting- Meaning & Procedure, Positioning- Meaning, Usefulness, Product Positioning Strategy

UNIT3: Product, Pricing & Marketing Mix:

Marketing Mix, Product – Concept, Product Decision, New Product Development, New Product Planning & Development, Product Mix, Product Life Cycle, Pricing – Objective, Decision, Method of Setting Pricing, Pricing Strategies

UNIT4: Promotion Mix & Physical Distribution Decision:

Meaning, Element of Promotion Mix – Advertising, Publicity, Sales Promotion, Personal Selling, Direct Marketing & Public Relation, Physical Distribution (Place) – Meaning, Type of Channels

UNIT5: Management Information System & Marketing Research:

Concept & components of MIS, Marketing Research – Meaning & Scope, Marketing Research Procedure, Need for Marketing Research, Green Marketing

Name of Course: Gas Dynamics
Type of Course: Value Added Course
Course Code: ME-12021
Academic Year: 2020-21
Duration of course: 60 Hours

Unit-1: Fundamentals of compressible flow

Ideal gas relationship, The adiabatic energy equation, Mach number, and its significance, Mach waves, Mach cone, and Mach angle, static and stagnation states, relationship between stagnation temperature, pressure, density and enthalpy in terms of Mach number, stagnation velocity of sound, reference speeds, various regions of flow, Effect of Mach number on compressibility, Area velocity relationship

Unit-2: One Dimensional Isentropic flow

General features of isentropic flow, performance curve, Comparison of adiabatic and isentropic process, One dimensional isentropic flow in ducts of varying cross-section-nozzles and diffusers, operation of nozzles under varying pressure ratio, mass flow rate in nozzles, critical properties and choking, area ratio as function of Mach number, Impulse function, non-dimensional mass flow rate in terms of pressure ratio, area ratio and Mach number, Working charts and gas tables, Application of Isentropic flow. Wind tunnels: Requirements, classification, and applications of different types of wind tunnels.

Unit-3: Normal shock Waves

Development of shock wave, Thickness of shock wave, governing equations, Strength of shock waves, Prandtl-Mayer relation, Rankine-Hugoniot relation, Mach number in the downstream of normal shock, variation of flow parameters across the normal shock, normal shock in Fanno and Rayleigh flows, impossibility of a rarefaction shock, supersonic diffusers, supersonic pitot tube

Unit-4: Flow in constant area duct with friction (Fanno flow)

Fanno curve and Fanno flow equations, solution of Fanno flow equations, variation of flow properties, variation of Mach no. with duct length, isothermal flow in constant area duct with friction, tables and charts for Fanno flow, Experimental friction coefficients

Value Added Course

Introduction and hands on training on Chems sketch software (CHEM-VA-103)

Course Outcomes

On successful completion of this course, students should be able to:

1. Student will be able to understand the basic tools about drawing the structures of chemical compounds.
2. Student will be able to understand and able to find out the name generation from structures, conversion of name of molecule into its structure, calculation of physical properties such as density, molecular weight, molecular formula, refractive index from structural formula, bond angles, bond lengths, dihedral angles.
3. Student will be able to visualize molecule in 3-D, understand the concept of symmetry elements and symmetry operations.
4. Understand the detail chemistry and use of Chems sketch software for drawing of variety of chemistry molecules, spectral simulations etc.

Unit – 1

Introduction, download and installation process, Drawing various chemical structures (acyclic, cyclic, polycyclic, heterocyclic), name generation from structures, conversion of name of molecule into its structure, calculation of physical properties such as density, molecular weight, molecular formula, refractive index from structural formula, bond angles, bond lengths, dihedral angles.

Unit – 2

Introduction to basic features of Chems sketch, Chemical structure to name conversion, Chemical name to structure conversion, NMR spectrum simulation (both H NMR & C13 NMR), Mass spectrum simulation, structure clean up, export to SVG, PDF. Molecular modelling, create and modifying images of chemical structures, write and perform chemical equations and diagrams

Introduction and hands on training on Chems sketch software Lab

1. Hands on training on software.

VALUE ADDED COURSE

Introduction to Financial Market

Course Outcome:

- The objective of this paper is to familiarize the participants with the concepts of financial services and system prevailing in India.

UNIT 1- Financial System

An overview of Financial System, Financial Markets, Structure of Financial Market (Organised and unorganised market), Components of Financial System, Major Financial Intermediaries, Financial products, Functions of Financial System, Regulatory framework of Indian financial system, (Overview of SEBI and RBI-Role and importance as regulators).

UNIT 2- Commercial Banks, RBI and Development Banks

Concept of Commercial Banks- Functions, Investment Policy of Commercial Banks, Liquidity in Banks, Asset structure of commercial banks, Non-Performing Assets, Interest Rate Reforms, Capital Adequacy Norms, Reserve Bank of India- Organisation and Management, Role and Functions, Development Banks- Characteristics of Development Banks, Need and emergence of Development Financial Institutions in India, Functions of Development Banks.

UNIT 3- Insurance

Concept, Basic Characteristics of Insurance, Insurance Company Operations, Principles of Insurance, Reinsurance, Purpose and need of Insurance, Different kinds of Life Insurance Products, Basic Idea about Fire and Marine Insurance and Banc assurance

UNIT 4- Mutual Funds

Concept of Mutual Funds, Growth of Mutual Funds in India, Features and Importance Mutual Fund, Mutual Fund Schemes, Money Market Mutual Funds, Private School Mutual Funds, Evaluation of the Performance of Mutual Funds, Functioning of Mutual Funds in India.

UNIT 5- Lease Finance and Venture Capital Finance

Lease Finance- Meaning, definition and types of lease agreements; advantages and disadvantages from the point of view of lessor and lessee; purchase v/s leasing, borrowing v/s leasing; lease finance in India Venture Capital Financing – meaning, importance/need, scope of venture capital finance; venture capital v/s investors; Venture Capital in India

VALUE ADDED COURSE

Introduction to Robotics

Course Outcomes:

After the completion of the course, student will be able to:

1. Understand the robotics design and implementation.
2. Gain the knowledge on fundamentals of robotic programming
3. Comprehend, classify and analyze the behavior of different types of sensors and actuators.
4. Understand the ROS fundamentals
5. Gain the knowledge about the types of actuators: electrical, pneumatic, and hydraulic, performance criteria and selection.

Unit: 1 Robotics Introduction

Robot Introduction- Seven Criteria of Defining a Robot, Robot Controllers-Major Components, Robot Vocabularies- Robotics Middleware Basics.

Unit: 2 Programming the Robot's Sensors

A close look at Sensors, Programming the Robot's Sensors, Programming the Actuators , Building Robot's Softbot

Unit: 3 Robot Operating System (ROS)

ROS Basics-ROS Equation, History of ROS, Sensors and Robots Supporting ROS, ROS Architecture and Concepts, ROS Filesystem Level, ROS Computation Graph Level, ROS Community Level

Unit: 4 ROS Fundamentals

Ubuntu Linux for Robotics-Ubuntu Graphical User Interface, Shell Commands, C++ and Python for Robotic Programming- Basic Concepts with Examples

FULL STACK WEB DEVELOPMENT

UNIT - I	<p>HTML:- Introduction to HTML, Browsers and HTML, Editor's Offline and Online, Tags, Attribute and Elements, Doctype Element, Comments, Headings, Paragraphs, and Formatting Text, Lists and Links, Images and Tables.</p> <p>CSS:- Introduction CSS, Applying CSS to HTML, Selectors, Properties and Values, CSS Colors and Backgrounds, CSS Box Model, CSS Margins, Padding, and Borders, CSS Text and Font Properties, CSS General Topics</p>
UNIT - II	<p>JavaScript:- Introduction to JavaScript, Applying JavaScript (internal and external), Understanding JS Syntax, Introduction to Document and Window Object, Variables and Operators, Data Types and Num Type Conversion, Math and String Manipulation, Objects and Arrays, Date and Time, Conditional Statements, Switch Case, Looping in JS, Functions.</p> <p>ReactJS:- Introduction, Templating using JSX, Components, State and Props, Lifecycle of Components, Rendering List and Portals, Error Handling, Routers, Redux and Redux Saga, Immutable.js, Service Side Rendering Unit Testing, Webpack</p>
UNIT - III	<p>NodeJS:- Node js Overview, Node js - Basics and Setup, Node js Console, Node js Command Utilities Node js Modules Node js Concepts Node js Events Node js with Express js Node js Database Access</p> <p>MongoDB:- SQL and NoSql Concepts, Create and Manage MongoDB, Migration of Data into MongoDB, MongoDB with PHP, MongoDB with NodeJS, Services Offered by MongoDB</p>
UNIT - IV	<p>Python:- Learn the basics of python and use it to develop applications. Also learn to work with mongodb in python. This additional language is a value-added skill as python is increasingly in demand for full stack projects. In this module, you will learn: Python Installation & Configuration, Developing a Python Application, Connect MongoDB with Python</p>

VAC

**B TECH CIVIL ENGINEERING
LAND SURVEYING**

Internal Evaluation: 50 Marks
External Examination: 50 Marks
Duration of Examination: 03 Hours

L	T	P	Cr
3	1	-	4

Course Objective:

To acquaint students about basic principles and basic instruments related with land surveying & they will learn the various methods and techniques used in land surveying

- UNIT-I** Classifications and basic principles of surveying – Equipment and accessories for ranging and chaining – Methods of ranging – Compass – Types of Compass – Basic Principles Bearing – Types – True Bearing – Magnetic Bearing. Plane Table Surveying- Parts and accessories. Methods of surveying. Two-point and three-point problems.
- UNIT-II** Levelling- Principles and theory of Levelling – Datum- – Bench Marks – Temporary and Permanent Adjustments- Methods of Levelling- Booking – Reduction – Sources of errors in Levelling – Curvature and refraction. Horizontal and vertical angle measurements – Temporary and permanent adjustments – Heights and distances – Contour – Contouring – Characteristics of contours – Methods of contouring – Tachometric contouring – Contour gradient – Uses of contour plan and map
- UNIT-III** Curve Surveying-Curves – Necessity – Types, Simple curves, Elements, Designation of curves; Setting out simple curves by linear methods, Transition curves Characteristics, Vertical curves –Types. Introduction to Geodetic Surveying, Principal & classification of triangulation system, Selection of base line and stations, Orders of triangulation- triangulation figures, Station marks.
- UNIT-IV** Field Astronomy: Introduction & Instruments purpose, Astronomical terms, Time & conversion of time, Abbreviations, Determination of azimuth, Latitude and longitude. Total Station : Advantages – Fundamental quantities measured – Parts and accessories – working principle – On board calculations – Field procedure – Errors and Good practices in using Total Station

Name of Course: Management Information Systems

Type of Course: Value Added Course

Course Code: ME-42021

Academic Year: 2020-21

Duration of course: 60 Hours

Unit 1

Introduction to Management Information systems :Types of MIS, Capabilities, Complements, CCR Framework; Role of manager with respect to IT in an organization

Database management systems, Data Warehousing, Foundations of business intelligence, Data and Text Mining.

Strategic Enterprise Systems - ERP, SCM, CRM, SRM.

Operational Support Systems - Manufacturing Systems, Sales and Marketing Systems, HRIS,

Unit 2

Finance and Accounting Systems

IT Strategy and Balanced Scorecard – IT strategies, IT- business alignment, balanced scorecard, cloud and vendor strategies

Mobile and E-commerce – B2C, B2B and e-procurement, C2C and mobile commerce

Unit 3

Emerging Technologies – Cloud computing, Big Data Technologies, Internet of Things, Bring Your Own Device (BYoD,) Virtual Reality, Augmented Reality, Blockchain, Artificial Intelligence Emerging Technologies

Unit 4

Knowledge Management – Decision Support Systems, Expert Systems, Learning Management Systems, Executive Information Systems

Social ,ethical and security issues in MIS

Market Research and Consumer Behavior

Course Objectives

1. To give the students a perspective to understand the application of market research in framing effective marketing strategies.
2. To understand consumer behaviour in an informed and systematic way.
3. To analyse personal, socio-cultural, and environmental dimensions that influence consumer decisions making.
4. To enable students in designing and evaluating the marketing strategies based on fundamentals of consumer buying behaviour.

Unit I: Market Research: Concept and significance; Types of Research; Research approach and Process; Consumer research paradigms; Combining qualitative and quantitative research; Sampling, Data – Types and Collection; Questionnaire and Schedule; Scaling Techniques; Data analysis & reporting research findings; Barriers to market research.

Unit II: Consumer behavior: Concept and Implications; Integration of consumer behavior in the marketing concept; Consumer Decision Making Process; Levels of consumer decision making; Types of Consumer Decision Making.

Unit III: Key Determinants of Consumer Behaviour and Marketing Strategy; Providing Customer Value and Retention; Market segmentation: Concept, Bases and Significance; How market segmentation operates; Criteria for effective targeting of market segments; Target Marketing strategies.

Unit IV: Consumer Motivation; Dynamics of Motivation, type and systems of needs; Personality and theories of personality (relevant to marketing); Consumer diversity; Self and self-image; Consumer Perception; Dynamics of perception and consumer imagery; Consumer Learning; Behavioral and cognitive learning theories; Consumer Attitude; Attitude formation and behavior; Communication and consumer behavior.

Name of Course: Modeling and Simulation

Type of Course: Value Added Course

Course Code: ME-32021

Academic Year: 2020-21

Duration of course: 60 Hours

Unit 1

Fundamental Concepts in Mathematical Modelling: Abstraction – linearity and superposition – balance and conservation laws and the system – boundary approach.

Lumped – Element Modeling: Mechanical systems – Translational, rotational. Hydraulic systems. Thermal systems. RLC Electrical Systems.

Unit 2

Modeling of First-order and Second-order Systems: Governing equations for free and forced responses – transient response specifications – experimental determination – Laplace transform. Time Domain, Frequency Domain and State Space.

Unit 3

Frequency response of Linear, Time invariant systems – frequency response of first-order and second-order systems – state space formulations of systems problems relating frequency response to pole location – transient response-poles and frequency response.

Unit 4

Feedback systems: Systems with feedback – block diagrams – properties of feedback systems – relative stability – phase and gain margins.

OBJECT ORIENTED PROGRAMMING USING JAVA

UNIT-I Overview of fundamentals of object oriented programming, Introduction to Java: java history, Evolution of java, Java and internet, Java and world wide web, Java environment, Importance and Features of Java, Keywords, Constants, Variables and Data Types, Operators and Expressions, Decision Making, Branching and Looping, If-else, Switch, Operator, While, Do, For Statements, Labeled Loops, Jump Statements, Break, Continue, Return, Introducing Classes, Objects and Methods, Defining a Class, Adding Variables and Methods, Creating Objects, Constructors, Class Inheritance, Arrays and Strings: Creating an Array, One and Two Dimensional Arrays, String Array and Methods, String and String Buffer, Classes, Wrapper classes

UNIT-II Inheritance, Basics Types, Using Super, Multilevel Hierarchy Abstract and Final classes, Object class, Packages and interfaces, Access protection, Extending Interfaces, Packages, Exception Handling, Fundamentals Exception Types, Uncaught Exceptions, Throw, Throw, Final, Built in Exception, Creating your own Exceptions, Multithreaded Programming: Fundamentals, Java Thread Model, Priorities, Synchronization, Messaging, Thread Class, Runnable Interface, Inter thread Communication, Suspending, Resuming and Stopping Threads, Hibernate, Principles of Object Relational Mapping, Hibernate configuration, Session Management, Flushing, Concurrency and Hibernate, Optimistic and Pessimistic Locking.

UNIT-III Input/ Output, Basics, Streams, Byte and Character Stream, Predefined Streams, Reading and Writing From Console and Files, Using Standard Java Packages (Lang, Util, Jo, Net), Networking, Basics, Networking Classes and Interfaces, Using java.net Package, Doing TCP/IP and Datagram Programming, Programming with Java, J2ME architecture, Bluetooth Package Interface, Classes, Exceptions, Event Handling: Different mechanism, Event Classes, Event Listener Interfaces, Adapter and Inner Classes, Working with windows, Graphics and text, Using AWT controls, Layout managers and menus, Handling Image, Animation, Sound and video, Java Applet, Spring, Introduction of Spring Framework, Spring Architecture, Spring Framework Definition, Spring & MVC, Factory Pattern, Bean Factory.

UNIT-IV J2EE: Introduction to J2EE, Building J2EE Applications, JDBC, Servlets and Web Applications, Java Server Pages and Model/View/Controller, J2EE Web Services Overview, Introduction to EJB, Session EJBs, Entity EJBs, JMS and message driven Beans, Transactions and Security, Application Servers, Web Services.

Project Management: The Basics For Success

Course Objective

The objective of this paper is to familiarize the participants with concepts, techniques and skills of project management and control and their applications in business

UNIT 1:

Concept of Project; categories of projects; project development cycle; the concept of project management; tools and techniques of project management; forms of project organizations

UNIT 2:

Project identification, project formulation and preparation; market and demand estimation; market survey; demand forecasting; technical factors – material inputs, technology, production, plant capacity, location and site; civil works, charts, layouts, work schedule;

UNIT 3:

Cost of project, means of financing, estimates of cost, financial projections, technical, economic, financial, legal and social appraisal of industrial projects;

UNIT 4:

Problems arising due to rate of discount, wage rate; treatment of taxes; social cost benefits; treatment of risk and uncertainty; sensitivity analysis and probability approach – single as well as multiple projects

UNIT 5:

Project scheduling; network techniques for resource; cost budgeting and scheduling; project management teams and coordination; monitoring and post implementation; evaluation of the project; project financing

SEO (Search Engine Optimization)

COURSE OUTCOMES

1. Understand the basic principles of SEO, including the role of search engines, the importance of keyword research, and the factors that influence search engine rankings.
2. Understand the different types of SEO, including on-page SEO, off-page SEO, and technical SEO.
3. Be able to conduct keyword research and use that research to optimize website content for search engines.
4. Understand the principles of off-page optimization, including link building, social media optimization, and online reputation management.
5. Be able to use SEO tools such as Google Analytics, Google Search Console, and Moz to track website performance and optimize for search engines.

UNIT-I	Introduction To SEO:- What is a search engine?, How search engines works?, What Is SEO?, What is the need of SEO, History Of SEO, How SEO Works, What is Google Boat (Google Crawler), Types Of SEO technique, What Is Google's SEO Algorithm updates?, How to create planning and strategies for SEO, What is SEO tools and why we need it?
UNIT-II	Technical SEO:- What Is Technical SEO, Technical SEO Ranking factors, Type of meta tags and their effect on SEO, Website architecture Optimization, Breadcrumbs, Permalinks optimization, Canonicalization, What Is Robots.txt, File & How to create it, Setup of CDN, Installation of SSL, How to Improve Website Performance & Speed using Plugin, How to perform the PageSpeed Test, XML and HTML sitemap creation and optimization, How to Add and verify a website in Google Console, Google Analytics setup and monitoring
UNIT-III	Keyword Research Process Keyword research is the heart of SEO. Without the right keyword at the right time, you cannot rank a website in SERP. The following topics will be covered in Keyword Research. What Is Keyword The impotence of Keyword Research?

Mewar University, Gangrar, Chittorgarh

Department of Electrical Engineering

Value Added Course on Solar Energy Products

Course Code: VAC-EE-1(2020-21)

Course Outcomes:-

At the end of this course, students will able to

1. To design solar photovoltaic power generating units in various modes.
2. To Design of Solar Water Heater & Installation
3. To Design of various types of Solar Based Lighting Products
4. To Design of Solar cooking
5. How to installation of roof top solar system

UNIT -1 –Principle of Solar Photovoltaic System

Introduction, Sun movement over the day, shadowing effects, Photovoltaic Cell. Advantages & disadvantages of photo-voltaic conversion. Use of solar cell in various instruments. Photo-voltaic array & its connections, arrangements of array according to the voltage. Module & its connections. Faults & their effects in photo-voltaic cell, array & module (connection of cell, connection of array, connection of module)

UNIT -2 - Solar water Heater

Principals of solar thermal systems, Technology's in solar water heating systems, salient features of solar water heating systems, Types of solar heating systems available, Application of solar water heating systems, installing of solar water heating systems, advantages and disadvantages solar water heating systems.

UNIT-3 - Solar lighting system

Description of main parts of solar lighting system: Solar Lantern, street light, home light, Charge controller, Storage battery, Inverter, Laminar, Maintenance of solar lighting system, types and advantages of solar outdoor lighting Comparative study of Conventional lighting system & solar lighting system

UNIT – 4 - Solar cooking

Benefits of solar cooking, advantages and disadvantages solar cooking, principals and application of solar cooking, solar wall applications, solar safe drinking water systems, solar air heating drying systems, solar powered water pumps and salient features, types of solar powered pumps, advantages, and limitations of solar powered pumps, maintenance and tracking systems.

UNIT – 5 – Module 4: Roof Top

Technical Standards and Specification, Types of Roof top, Capacity Limiting, Technical Considerations, Standards and Specifications, Grid Connected Rooftop Solar System, Benefits from the Grid Connected Rooftop Solar System, Types of metering arrangements, Rooftop Solar Programme by Government of India and Objectives of the Programme.
